## Control Panel

Well aware of the unique character of your project, which requirements are both specific and singular, our team of engineers is attentive to your needs from the elaboration of the basic concept right to the delivery of the Control Panel exactly matching your criteria.

Thanks to our multidisciplinary expertise, we elaborate the design and the architecture of your product cleverly combining components already existing on the market with targeted solutions, thus enabling you to acquire customized Control Panels including only the elements and commands specific to your requirements.

With this unique approach, we are able to offer you Control Panel of the highest quality within very short deadlines, at an unbeatable price even if your order is placed for small series.

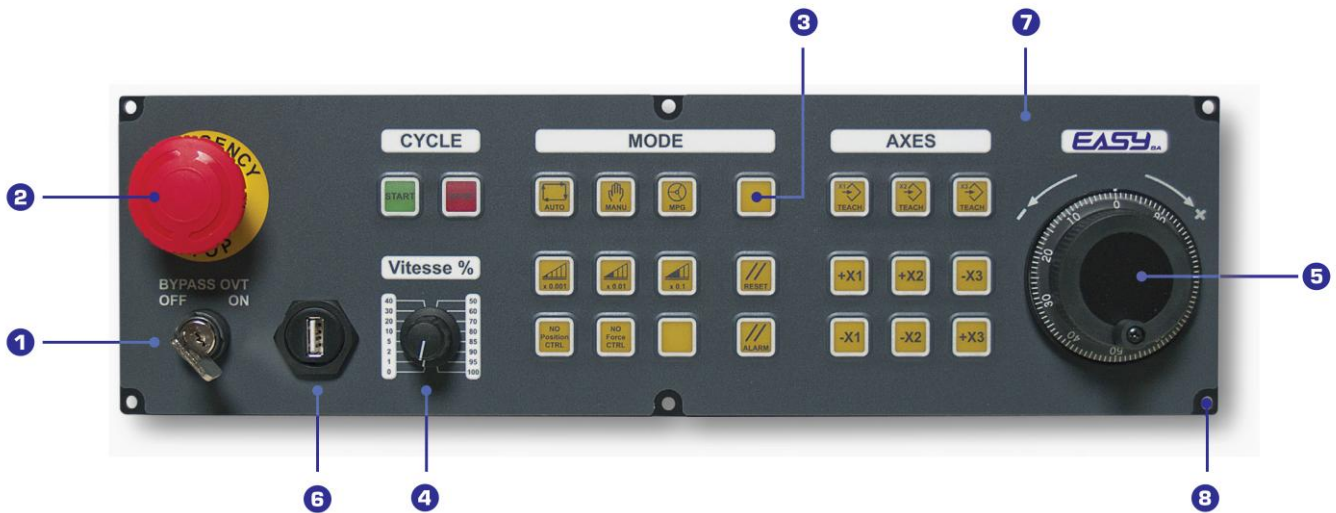

We thoroughly check all stages of manufacturing according to 3 axes :

- Purchase of critical components at the best price on the market while maintaining constant stock levels
- Assembly of electro-mechanic and electronic components in conformity with our in-house standards, confirmed at every stage of the process by a battery of verifications tests
- Rigorous logistics which enable delivery under very tight deadlines, whatever the order quantity.
