EASY_{SA}

Tunnels and road equipments

The control and monitoring of equipments in roads and tunnels don't have anymore secrets for **EASYsa**.

The numerous works built for over a decade have enabled the confirmation of competences in complex projects, the establishment of collaborations and partnerships efficient and profitable, and finally the development of customized products to replace weak links of standard solutions.

Skills

- Fire detection
- Road traffic management
- Tunnel ventilation
- Air conditioning of technical rooms
- Road lighting
- Alarming system
- Supervision of power distribution
- Management system
- Automation of oil separator

Partners

Products

HC-TS Traffic light controller

IF-CM Monitoring and measurement of current

HC-KB Control panel with manual functions
